

## CARDBOARD PACKAGING

### Dear partners and colleagues!

The manufacturer of cardboard packaging "Origamo" presents you the most complete warehouse range of products from which you can choose the items you need. We produce all types of packaging made of cardboard and microgofrocard.

In addition to popular items in stock, we offer additional services from our construction department and design bureau:

- *development of design solutions and layouts for your individual packaging;*
- *production of packaging without printing or with printing by various methods (offset, foil stamping);*
- *hot and cold lamination, lamination of pre-cut windows, selective application of varnish (UV, offset, VD).*

In production we use various types of films: matte, glossy, metallized, with the effect of antifog, perforated and bio-degradable.

We produce high-quality gluing and lamination of packaging for use in microwave ovens, steam convectomats and convection ovens, shock freezing and other technological environments of application.

Valuing our reputation and the reputation of our partners, we do business fairly and legitimately, you can always rely on us.

You can entrust us with your most challenging cartonboard packaging tasks.

---

*With respect to you and your business,*  
**Sergey Maralin**  
*Origamo, General Director*

## From idea to embodiment

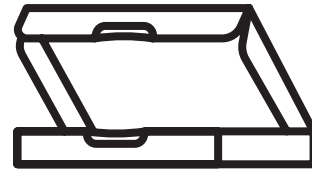

Have you created a product that you can be proud of?  
So, it's time to complement it with impeccable packaging!

### Don't hesitate and visit Origamo!

- Have a new brand?
- Have a new product?
- Want your packaging restyled?

### Packaging as an element of taking your product to the next level

- Design solution.
- Any packaging with your logo.
- Carefully selected materials.
- Prepared mock-ups.
- Colour samples.

### Offset printing, from a box to a leaflet

- Offset printing
- Hot foil stamping
